

OuiVerte!

OuiVerte is a simple PHP Website.

Installation

1. Get the Code

- Clone the repository:

```
git clone https://github.com/al-kafi-sohag/OuiVerte.git
```

- Or download the ZIP file from the repository and extract it

2. Server Requirements

- PHP 7.4 or higher
- Apache web server with mod_rewrite enabled

3. Configuration

Open `inc/config.php` and modify the following constants according to your setup:

```
define("BASE_URL", "your-website-url");
define("APP_NAME", "your-app-name");
define("APP_SLOGAN", "your-app-slogan");
```

4. Web Server Configuration

- Make sure the `.htaccess` file is present in the root directory
- Ensure your web server has the required permissions to read and execute the files

Security Features

- CSRF Protection
- XSS Protection
- Content Security Headers
- Frame Protection
